QUICKSTART

GETTING A QUICK START

Make sure that the WRITE PROTECT tab on your disk is in the READ/WRITE position. Insert the POKER SOLITAIRE disk in your Amiga when workbench is requested or insert it, and warm boot and you're off ! Use the mouse to position cards ... Good Luck ! If you need a little more help please read on

POKER SOLITAIRE runs on any Amiga® with Kickstart ® 1.2 or later and at least 512K of memory.

POKER SOLITAIRE is designed to take full advantage of the mouse interface so insure that your mouse is installed in the game port on your computer.

BEFORE YOU START WE RECOMMEND THAT YOU MAKE A BACKUP COPY OF POKER SOLITAIRE. THE GAME DISK IS NOT COPY PROTECTED !! ANY COPY PROGRAM WILL WORK.

MAKE A BACKUP

Use any copy program or use DISKCOPY provided in your workbench disk. If you need help making a copy please refer to your Amiga manual. Once you have made a copy put the original in a safe place and you are ready to begin.

GETTING STARTED

Turn on your Amiga and install Kickstart 1.2 (this is done automatically on the Amiga 500 and Amiga 2000) like you normally do. When the system requests Workbench, insert POKER SOLITAIRE in the internal disk drive and it will boot automatically.

If your Amiga is already on, use the warm reboot process to start **Poker Solitaire**, i.e. Insert the POKER SOLITAIRE disk in your internal drive then press the CTRL key and the left and right Amiga keys all at the same time. Your game will automatically startup.

After several seconds the start-up/credits screen will appear showing game credits. (Strike any key to shorten startup.) A few seconds more and you will be requested to locate and enter a verification key word from your manual (this is it). Sorry about the Keyword requirement but it appears that this is necessary to slow down the pirates. Simply use your manual to look up the requested keyword on the appropriate page number, line number and word position and enter it in the requester on the title screen. Example: Line 21, Page 2, Word 2 is "AND".

After pressing return the VOICE selection screen will appear offering you a choice of MALE, FEMALE, or NONE. To select the voice simply move the mouse pointer into the appropriate box and click the left button. Selecting none will reduce the game loading time considerably although game play is enhanced with male or female voices. You can change the voice any time during the game.

PLAYING THE GAME

THE OBJECTIVE OF THE GAME

Form the best 5 card stud poker hand in each of 5 rows, 5 columns and 2 diagonals for a total of 12 hands. Since each hand may be dependent on another place cards so that you can form good hands in both rows and columns. Hand values are based on standard poker hands, which are covered in detail in a later section of this manual.

GAME PLAY

After the game begins a screen appears with a series of rectangles on the left side and the scoreboard - card deck (in blue) on the right. Play begins by placing the top card from the deck into one of the rectangle on the game board. This is done by positioning the mouse pointer in the desired rectangle and pressing the left mouse button. The card will move from the deck to the selected position. Once played, a card cannot be moved. Continue in this manner placing cards to form the best hands in the rows (horizontal), columns (vertical) and diagonals.

When all 25 cards are played, the 12 hands are all evaluated automatically. As each hand is evaluated the value (Flush, Full House, etc.) and total points accumulated are displayed on the scoreboard. If you choose a voice the value of the hand will be spoken as well as displayed. For more information on voices see the manual section Voice Menu. Upon completion of the evaluation sequence your high

1 game (current) score is shown. If it is among the
2 top ten all time high scores, the High Scores window
3 will appear with a place for you to enter your ini-
4 tials. After you enter your initials, click the small
5 (close window) box in the corner of the screen to
6 record your score (this may take a few seconds) and
7 continue game play. (You can view high scores by

23 Upon placing the card, play switches to Player 2
24 who then positions the same card wherever they
25 choose. Play continues in this fashion until all 25
26 cards are played.

27
28 When all 25 cards are played the hands are eval-
29 uated as previously described, first for Player 2 then

The TIMED mode selection pits you against the clock. The clock starts at 80 seconds, for every second remaining after all 25 cards are played you receive 2 points, for every second over 80 you are penalized 2 points.

The GAMBLE mode selection allows you to use your skill and a little of Lady Luck's help to beat the system. Who know's **Poker Solitaire** may be a Casino hit someday .. All you have to do is score better than 120 points per game and you're in the Money !

VOICES MENU

This menu selection allows you to choose the voice spoken during hand evaluation. Options include MALE, FEMALE and NONE. This menu choice can be made any time during play of the game.

Note: Changing the voice from to MALE or FEMALE will suspend game play for approximately 20-30 seconds while the voice loads. This may be a good time for another cup of java, a soda, or a brewski.
